The Open Group
Cloud Computing Survey

May 9, 2011
About the Survey

Cloud has been at the forefront of every IT discussion in 2011 and will continue to be, due to the potential system optimization and cost savings that are associated with it. However, industry-wide motivation and business impact behind Cloud implementation remains unclear. To better understand the top end-user business requirements for Cloud Computing and to determine how companies are measuring ROI, The Open Group surveyed 307 Cloud specialists at global organizations ranging in size from fewer than 200 to more than 5,000 employees. The survey was carried out online in February and March of 2011.

Major Conclusions

• Majority of organizations needed buy-in from CIO or another C-level executive to fund Cloud Computing initiatives
• Main drivers behind Cloud Computing implementations were cost, resource optimization and timeliness/agility of new services
• Most organizations using Cloud Computing did not have an ROI mechanism in place
• 82 percent of survey participants believed Cloud Computing would significantly impact one or more business processes
• Top concerns surrounding Cloud Computing were security, governance, integration issues and ability to cope with business process change
Who was surveyed?

Where is your organization headquartered?

- North America: 35%
- Latin America: 8%
- Europe: 32%
- Africa: 22%
- Asia Pacific: 3%

What size is your organization?

- < 250 employees: 52%
- Between 250 and 1,000 employees: 28%
- Between 1,000 and 2,500 employees: 10%
- Between 2,500 and 5,000 employees: 5%
- > 5,000 employees: 5%

What level best represents your position at your organization?

- C-level: 19%
- VP/SVP/EVP level: 15%
- Director level: 22%
- Manager level: 37%
- Individual contributor: 7%

What best describes where Cloud Computing fits into your organization’s IT roadmap?

- Currently implementing for business use (at least 18 months) - 25%
- Recently began implementing for business use (within last 12 months) - 24%
- On radar or actively researching for business use - 8%
- Not on our IT roadmap - 43%
Which Cloud deployment model best meets your organization’s business requirements?
Cloud Decision Making

Who controls buying decisions?

Executive level buy-in required?

Copyright © The Open Group 2011
What are the main reasons for your organization to use Cloud Computing?
Cloud ROI

Cloud ROI to address business requirements in your organization would be:

- 45% Easy to evaluate and justify
- 66% Hard to evaluate and justify

Are there any mechanisms in place to measure ROI for your Cloud Computing initiative?

Which Cloud ROI metrics would be useful?

- 35% Cost
- 20% Margin
- 15% Quality of delivered result
- 10% Scale of operation
- 10% Speed of operation
- 10% Utilization of resource
- 5% None of the above
- 5% Other

Impact of Cloud

Do you expect your Cloud initiative to significantly impact one or more business processes?

- Yes: 82%
- No: 18%

If yes, how prepared are you for these changes?

- Prepared: 28%
- Not prepared: 72%
What are your biggest concerns surrounding the Cloud today?

- Ability to cope with change
- Cost to deploy
- Governance
- Integration issues
- Lost revenues from lack of capacity
- Lost customers from performance issues
- Measuring ROI
- Regulatory/compliance
- Security
- Skills shortage
- Vendor lock-in
- Other
Top Concerns with Cloud

What are you main concerns with using an outside Cloud provider?

- Cost: 19%
- Interoperability/Portability: 16%
- Performance issues: 17%
- Security: 20%
- Vendor lock-in: 1%
- None of the above: 1%
- Other: 1%

How is your organization addressing concerns about data security and privacy surrounding the Cloud?

- Use existing information security controls: 41%
- Created new information security controls: 8%
- Use Cloud service provider’s controls: 33%
- Other: 18%
How satisfied are you with the level of available Cloud educational resources and professional training?
Commentary and Analysis

“The ability to transform business is the most exciting feature of the Cloud phenomenon. The survey shows users recognize that Cloud Computing will impact their business processes, but that they are not yet prepared to handle that impact or, in many cases, even to measure it.”

~ Dr. Chris Harding, Forum Director for The Open Group
