Open Platform 3.0

31 October 2013

Dr Christopher J Harding
Director for Interoperability
c.harding@opengroup.org
Open Platform 3.0™ Objectives

- Enterprises should be able to create, evolve, adopt and use solutions based on current and future emerging technologies to achieve business value.

- These solutions should:
  - Enable Boundaryless Information Flow™
  - Allow users to mix and match technology products and services
  - Support the business innovations that enterprises want to make, including changes in the style of business operations.
Open Platform 3.0™ Requirements

- Enable use of technologies including mobile, social, cloud, big data, and Internet of Things
- Enable development and deployment of open and interoperable solutions by business people and IT specialists
- Support for identity, entitlement and access management
- Measurement, tracking and control of quality of service and quality of data
- Support for governance
- Portability
- Ease of Use
Bringing Technology Together

- Social Media
- Mobile Devices and Apps
- Sensors / "Internet of Things"
- Retail / Payments
- Others...

Data about Data

- Management & Stewardship
- Access
- Query & Search
- Apps, Workflow and Processing
- Index & Catalog
- Correlate & Reduce
- Store
- Others...
- Infrastructure
