Capturing Best Practice

Share-PSI 2.0 Timisoara

Dr Christopher J Harding
Director for Interoperability
c.harding@opengroup.org
The SHARE-PSI DoW

The inputs and outputs from each workshop will be aggregated into a single best practices document that, through an independent process, may become a recognised W3C standard. Importantly, this document will be localised in each of the countries covered by the network. Localisation will cover language(s) but, more importantly, it will refer to the specific implementation methods that apply in those countries. For example, how to contact a specific national or city-wide data portal, which controlled vocabularies should be used, which licence(s) is/are appropriate and so on.

The result will be country-specific guidance on implementing a harmonised approach to implementation of the PSI Directive on open data across at least a majority of European countries.
Work Package 7

- Following each workshop, initial draft of best practices from that workshop
- Stable version of best practices document (developed iteratively)
- Localized guides
Current State and Way Forward

- Large amount of great source material
- Small amount of captured best practice
- All groups in Timisoara will capture best practice material and post on wiki
- Phil will organize
- Project meetings in Krems and Berlin will review and discuss
- Consensus process will produce Best Practice Guide
Template

- Title
- Short description
- Why
- Intended Outcome
- Possible Approach
- How to Test
- Evidence

- Life Cycle Stage
- Tags
- Status
- Intended Audience
- Related Best Practices
Drafts on Wiki

- Cross Agency Strategy
- High Level Support
- Holistic Metrics
- User engagement and collaboration throughout the lifecycle
- Organisational-internal engagement

- Human Readability and Machine Processing
- Cost of Publication
- Stakeholders’ Interests and Rights
- Feedback to Improve Quality
- Optimization for Search Engines

http://www.w3.org/2013/share-psi/wiki/Best_Practices
Existing National Material

- Flemish legislation following PSI Directive (Noël)
- Spanish guide for the publication and licensing of reusable assets (Dolores)
- [http://www.w3.org/2013/share-psi/wiki/Localised_Guides](http://www.w3.org/2013/share-psi/wiki/Localised_Guides)
Thank you!
